

Job Title: Heavy Model Inspector	Club Name: WAMASC
Reports to: Chief Flying Instructor	Revision Date: 21/01/2016

Position Overview

The MAAA requires that Heavy and Gas Turbine powered Model Aircraft be operated in conformance to the CASA regulations, the MAAA Manual of Procedures, and MAAA safety requirements.

MAAA rules require that any Model Aircraft that weighs between 7Kgs and 50Kgs, Dry Weight, (without fuel but with all batteries) requires a valid Model Aircraft 3 year Permit to Fly, before it is allowed to take off and be flown.

A Model Aircraft 3 Year Permit to Fly, is issued by an MAAA Inspector: FW25, RW25, FW50, RW50 with/without Gas Turbine (GT) Endorsement, depending on the aircraft classification.

Responsibilities and Duties

- To comply with MOP015 in relation to all Heavy Model Inspections.
- Maintain Statistics as to operation of the schemes.
- Act as catalyst for exchange of best practice and areas that can be improved.
- Other related activities as required from time to time.
- To maintain a record of all aircraft inspected and produce this document to the WAMASC C.F.I. on a monthly basis.

Knowledge and skills required

- Can communicate effectively
- Is well informed of all organisational activities
- Is aware of the future directions and plans of members
- Has a good working knowledge of the constitution, rules and the duties of all office holders and subcommittees
- Is a supportive leader for all organization's members
- Holds Heavy Model certification by M.A.A.A.
